[www.imergroup.com](http://www.imergroup.com)

Dear Customer,  
compliments on your purchase: this IMER mixer, the result of long-standing experience in the field, features maximum reliability and innovative technical solutions.

#### - WORKING IN SAFETY

To work in complete safety, read the following instructions carefully before using the machine.

This OPERATION AND MAINTENANCE manual must be kept by the Site Manager and be always available for consultation.

The manual is considered part of the machine and must be stored for future reference (EN 12100-2) through to scrapping of the machine itself. Should the manual be lost or damaged, a replacement copy can be ordered from the manufacturer.

The manual contains important information regarding site preparation, machine use, maintenance procedures, and requests for spare parts. Nevertheless, the installer and the operator must both have adequate experience and knowledge of the machine prior to use.

In order to ensure operator safety, safe operation and long service life, it is imperative to adhere to the instructions set out herein and the requirements of the legislation in force governing safety in the workplace. Use individual safety equipment (suitable shoes and clothing, gloves, safety glasses, etc.).

#### - Make sure that all signs are legible.

#### - It is strictly forbidden to carry out any form of modification to the steel structure or working parts of the mixer.

IMER INTERNATIONAL accepts no liability for failure to comply with laws governing the use of this type of equipment, with particular reference to: improper use, incorrect power supply, lack of maintenance, unauthorised modifications, failure to comply, either wholly or partially, with the instructions set out in this manual.

IMER INTERNATIONAL reserves the right to modify features of the mixer and contents of this manual, without the obligation to update previous machines and/or manuals.

#### 1. TECHNICAL DATA

Technical data are stated in table 1 and electrical specifications in table 2.

Table 1 - TECHNICAL DATA

Model	MIX 120 PLUS
Drum capacity	120 l
Mix capacity (approx.)	60 l
Paddle rpm	38 Rpm
Paddle rotation direction (view from loading mouth)	Clockwise
Wheel dimensions	300 mm
Single phase motor power	1.4 kW
Overall dimensions (width x length x height)	780x880x1000 mm
Machine weight	130 Kg
Weight with packaging	139 Kg

Table 2

Feature	Motor (230V/50Hz)	Motor (230V/60Hz)	Motor (110V/50Hz)
Power (kW)	1.4	1.4	1.4
Rated voltage (V)	230	230	110
Frequency (Hz)	50	60	50
Absorbed current (A)	9	9.4	15
Number of poles	2	2	2
rpm	2800	2800	2800
Service type	S1	S1	S1
Insulation category	F	F	F
Protection category	IP55	IP55	IP55
Capacitor ( $\mu$ F)	50 (Ø 55x94)	50 (Ø 55x94)	100 (Ø 50x120)

#### 2. DESIGN AND CONSTRUCTION STANDARDS

The MIX 120 PLUS mixer is designed and constructed in line with the following harmonized standards: EN 12151:2008; EN 12100-1/2:2005; EN 60204-1:2006.

#### 3. NOISE LEVEL AND VIBRATIONS

Table 3 gives the sound pressure level of the machine measured at the ear of the operator when running empty (LPA) and vibrations transmitted when it is operating.

Table 3			
Model	Type of motor	L <sub>pA</sub>	A <sub>eq</sub>
MIX 120 PLUS	Electric	86 dB	2 m/s <sup>2</sup>

#### 4. DESCRIPTION AND OPERATION

- The mixer is intended for use on construction sites for mixing a wide range of fine grained materials, both wet and dry, premixed in bags or drawn from silos, of low and high viscosity (mortar, paints, plaster, cement, adhesives, resins, coatings, vibration-damping materials, insulation).

- Do not use the machine in environments subject to temperatures below 0°C.

The mixer is composed of a frame (ref.1, fig.1) which supports the mixing tank (ref.2, fig.1).

The tank mounts the gear reducer (ref.6, fig.1) driven by the motor (ref.5, fig.1) via a poly-V drive belt.

The reducer's output shaft delivers the drive to the mixer head).

The tank can be emptied by opening the outlet (ref.7, fig.1) by hand. The motor is started and stopped with the switch on the electrical cabinet (ref.8, fig.1).

The electrical cabinet has a plug (ref.9, fig.1) for connecting to the electric power supply.

#### 5. SAFETY MEASURES

The IMER mixer is designed to operate on construction sites and is not equipped with its own lighting; the work site must be well illuminated (min. 300 lux).

- Never use the machine in areas at risk of explosion/fires.

1. The IMER mixer will only run if all its safety devices are in place and in perfect condition.

2. Do not use improvised and/or defective power supply lines.

3. The connection lines on the site must be laid in such a way that they cannot be damaged. Never stand the mixer on its power supply cable.

4. The plug/socket connections must be protected from water. Use only connectors equipped with protection against water jets (IP67).

5. Repairs to the electrical installation must be performed exclusively by specialised personnel. Do not make any adjustments or carry out any maintenance work while the machine is powered up or running.

- Never put your hands or tools into the tank while the machine is running.

- Take care, when handling mix components, not to raise dust which may be inhaled. If this is not possible, masks must be worn to protect the mouth and nose.

- To stop the mixer, use the switch (ref.8, fig.1). Do not attempt to stop the mixer in any other manner.

#### 6. ELECTRICAL SAFETY

The IMER mixer is constructed in line with the provisions of EN 60204-1, and is protected against jets of water (IP 55) and equipped with protections against overloads and automatic restarting after power failures.

#### 7. MECHANICAL SAFETY

The hazardous points on the IMER mixer are protected by means of safety devices, which must remain fitted at all times and kept in perfect condition - as, for instance, the drive belt guard.

The tank is fitted with a guard which enables mix components to be loaded into it while preventing access to the mixing area (ref.10, fig.1).

The machine is equipped with an electrical safety (interlock) which prevents it from running when the mixer tank guard is open.

The machine is also equipped with a guard on its outlet to prevent access to the mixing area (ref.11, fig.1).

#### **8. TRANSPORT**

Use the machine's handles (fig.4) to move it; these must be pulled out one at a time:

1. grasp a handle (ref.1, fig.4) and remove its locking pin (ref.2, fig.4).
2. Pull the handle (ref.1, fig.4) fully upwards.
3. Fit the locking pin (ref.2, fig.4).

Repeat with the other handle.

The mixer may also be moved with its four wheels (fig.5).

**⚠ - Before moving the mixer in this way, make sure the tank guard safety hook (ref.12, fig.1) is engaged.**

When lifting with a hoist or similar equipment, hook a four-point harness into the holes on the frame (fig.3). Make sure the harness has arms of at least 1500 mm.

**⚠ - Each arm of the harness must be rated for loads greater than the total weight of the mixer.**

**⚠ - Always pull out its power plug before moving the mixer.**

#### **9. INSTALLATION**

Unpack the machine.

The machine is supplied with its legs removed, these must be assembled:

1. Fit the wheels into the rear legs and lock them with their cotters.
2. Raise the mixer and fit the front and rear legs; lock the legs at the desired height with their lock pins. Follow the layout given in fig.9.

The height of the mixer should enable easy unloading into the wheelbarrow used to move the mixed product around the worksite.

**⚠ - Place the mixer on a stable, level surface (max slope 5°, see fig.2), so that it doesn't sink into the ground or tip over when running.**

**⚠ - Leave at least 2 m clearance around the machine for handling materials and product.**

#### **10. ELECTRICAL MAINS CONNECTION**

**⚠ - Make certain that a residual current device and miniature circuit breaker are installed on the electrical power line.**

##### **10.1 Connecting versions with motor 230V/50Hz**

Ensure that the supply voltage corresponds to machine dataplate specifications. At full load it must be between 205V and 240V.

**⚠ - To supply the machine it is necessary to use a 2-pole + ground cable in order to ensure the machine's connection to the site's equipotential system.**

##### **10.2 Connecting versions with motor 110V/50Hz**

Ensure that the supply voltage corresponds to machine dataplate specifications. At full load it must be between 95V and 130V.

**⚠ - To supply the machine it is necessary to use a 2-pole + ground cable in order to ensure the machine's connection to the site's equipotential system.**

##### **10.4 Sizing the power supply cable**

The power supply line must be suitably sized to prevent voltage drops. Do not use cable winders. The electric cable wire size must take into account the operating currents and length of the line to avoid excessive voltage drops (table 4).

Table 4					
Model	Type of motor	Cable (mm <sup>2</sup> )			Cable length (m)
		1.5	2.5	4.0	
MIX 120 PLUS	230 V 9 A	0 ÷ 19	20 ÷ 32	33 ÷ 50	
	110 V 15 A	0 ÷ 12	13 ÷ 19	20 ÷ 30	

The power supply cables used on the site must have an outer jacket that is resistant to crushing, wear and weather (e.g. H07RN-F).

**⚠ - For the conformity of the power supply, see CEI-64-8 (harmo-**

*nisation of CENELEC HD384).*

#### **11. COMMISSIONING THE MACHINE**

Before connecting the machine to the electrical mains, ensure that all safety devices are fitted and are in perfect condition, that the extension cord is in good condition and that the plugs and sockets (of the type protected against jets of water) are not wet.

Connect the mains power cable to the plug on the electrical panel. Start the mixer with the switch on the cabinet (ref.8, fig.1).

**⚠ - The motor is protected against overloads by a thermal cutout. It stops the machine automatically if it overheats. Allow the motor to cool down before starting it up again.**

#### **12. EMERGENCY - STOP**

**⚠ - In case of emergency, stop the machine by turning the power switch to "0". Then pull out its power plug. To start again, reconnect the power plug and turn the power switch to "1".**

#### **13. OPERATION**

For best mixing results and regular operation, the mixer must be installed on a level surface.

**⚠ - Check that the machine stops as soon as the tank guard is opened.**

The machine must be started when the tank is empty.

**⚠ - Do not start the machine when it is fully loaded.**

The tank guard is equipped with bag breaker blades to facilitate using premixed product. Load the mix components alternately, in the amounts required for the type of product, so as to reduce mixing time as far as possible.

**⚠ - Load the material with the blades turning.**

**⚠ - Only load the specified products into the tank.**

**⚠ - Do not insert your hands or tools into the tank when the blades are turning.**

**⚠ - Do not fill the tank beyond its mixing capacity (table 1).**

Ruin the machine for as long as it takes to obtain an even mix of the right consistency.

Empty the tank with the blades turning by opening its outlet by hand. To do this, pull the lever (ref.1, fig.6), for its full stroke, to position B. To close the outlet, return the lever (ref.1, fig.5) to position A.

**⚠ - Make sure to place a container under the outlet before you empty out the tank.**

If any of the mix is left inside the tank for further use, the blades must be left turning until it is used. We recommend leaving the mix inside the tank as little as possible once it has reached the right consistency.

##### **13.1 Blades jam while running**

It may occur that the machine stops mixing because the mix is too dense.

To unjam the blades, proceed as follows:

1. Switch the machine off by setting the power switch (ref.8, fig.1) to "0".
2. Invert the direction of rotation of the blades by setting the switch (ref.8, fig.1) to "2".
3. Wait for a short time (5-10 seconds); then switch the machine off by setting the power switch (ref.8, fig.1) to "0".
4. Restore normal operation by turning the power switch (ref.8, fig.1) to "1".

**⚠ - The machine only runs properly with the power switch set to "1" (blades turn clockwise)**

#### **14. MAINTENANCE**

**⚠ - Maintenance must be done by adequately trained personnel, after switching off the machine, disconnecting it from the power supply and emptying the tank.**

**⚠ - Make sure the guards/safety equipment are always functional and in good condition.**

Every two months of operation, check:

- the belt tension.
- the condition of the poly-V drive belt and pulleys.

Check weekly that the plug contacts on the electrical cabinet are clean, dry and rust free.

**⚠ - Periodically check the condition of the power cable jackets exiting the cabinet.**

**⚠ - Periodically check, by raising the guard (ref.10, fig.1) 10-15 cm, that the machine stops as soon as the tank guard is opened.**

#### **14.1 Cleaning**

Before a long work pause or at the end of the shift, the mixer tank must be thoroughly cleaned by abundant washing. If you use a high-pressure hose to clean the machine, do not aim the water jet directly at the plug/socket connection or power switch.

**⚠ - When manually cleaning the tank, make sure not to run the machine.**

**⚠ - Do not dump the waste water on the site.**

**⚠ - If the guards are removed for cleaning, they must be reinstated on completion.**

Do not strike the tank with hammers, shovels, etc. Dents reduce the effectiveness of mixing and also make the tank harder to clean.

#### **14.2 Belt tension**

1. Switch off the motor and disconnect the power plug.
2. Remove the belt guard (ref.2, fig.7) by undoing the bolts securing it (ref.1, fig.7).
3. Loosen the 4 screws (ref.3, fig.7) securing electric motor mount and pull the belt (ref.5, fig.7) with the screw (ref.4, fig.7) if the tension is correct, applying a force of around  $F=1.5$  kg at the centre of the belt's free section should displace it by around  $f=5$  mm (fig.8).

**⚠ - Do not overtension the belt, as this reduces its life and that of the reducer and motor bearings.**

6. Once the belt is correctly tensioned, tighten down the 4 bolts (ref.3, fig.7).

7. Reinstall the belt guard (ref.2, fig.7) with its bolts.

#### **14.3 Replacing the belts**

1. Switch off the motor and disconnect the power plug.
2. Remove the belt guard (ref.2, fig.7) by undoing the bolts securing it (ref.1, fig.7).
3. Slacken off the 4 bolts (ref.3, fig.7) securing the motor mount and slacken off the belts (ref.5, fig.7) with the screw (ref.4, fig.7) until they can be slipped off the motor and drive reducer pulleys.
4. Fit the new belts, first onto the reducer pulley and then onto the motor pulley.
5. Tension the belts (ref.5, fig.7) with the screw (ref.4, fig.7): if the tension is correct, applying a force of around  $F=0.9$  kg at the centre of the belt's free section should displace it by around  $f=10$  mm (fig.8).
6. Once the belt is correctly tensioned, tighten down the 4 bolts (ref.3, fig.7).
7. Reinstall the belt guard (ref.2, fig.7) with its bolts.

Check the belt tension again after the first 4 hours of operation with the new belts, and repeat the check every 18-20 hours.

#### **14.4 Removing the outlet guard**

1. Undo the bolts (ref.20, fig.1) and remove the guard (ref.24, fig.1).
2. To refit the guard (ref.24, fig.1) align its holes with the mount holes and reinstall the bolts (ref.20, fig.1).

#### **14.5 Repairs**

Repairs must be done exclusively by specialised personnel. Use exclusively original IMER spare parts; modifications to parts are strictly prohibited.

**⚠ - Never start up the mixing machine during repairs.**

**⚠ - If any guards are removed for repairs, ensure they are correctly refitted at the end of work.**

#### **15. RESIDUAL RISKS AND SAFETY NOTICES**

Although the machine is constructed in line with established legislation, certain residual risks cannot be eliminated and require the use of individual safety equipment. The machine is equipped with notices to indicate the residual risks and how to avoid them.

#### **NOISE HAZARD**

**Wear ear defenders**

#### **HAND CRUSHING/SHEARING HAZARD**

**Wear gloves**

#### **EYE INJURY HAZARD**

**Wear safety glasses**

#### **INCORRECT USE HAZARD**

**Read the manual before operating the machine**

#### **TRAPPING/CRUSHING AND SHEARING HAZARD**

**Do not remove the guards**

**Do not touch drive components**

**Keep the hands away from the outlet**

#### **ELECTROCUTION HAZARD**

**Danger - electrical power**

Note that the employer is responsible for ensuring his workers use individual safety equipment.

#### **16. TROUBLESHOOTING**

**⚠ - CAUTION!!! All maintenance operations must be performed exclusively with the machine switched off, with the selector set to "0" and the power plug disconnected from the mains.**

Fault	Cause	Remedy
Motor does not start when switch is turned	Defective power cable	Check power cables *
	Plug not inserted in socket correctly	Ensure correct connection
	Power cable from plug to control panel detached	Remake the connection *
	Loose wire inside motor circuit board	Remake the connection *
	Loose wire inside motor circuit board	Remake the connection *
	Limit switch malfunction	Replace limit switch *
	Faulty main switch	Replace switch *
	The overload safety device has been activated	Wait for a few minutes and then try restarting the machine
	Tank guard open	Close tank guard
Outlet does not open	Blocked outlet guard	Remove and clean outlet guard
During mixing, the blades slow down or jam	Belts are worn or slack	Tension or replace the belts

\* Operation to be carried out by an electrician

### **CONDIZIONI DI GARANZIA**

Il servizio di garanzia deve essere richiesto al più vicino Centro di Assistenza Autorizzato (elenco consultabile presso i Rivenditori autorizzati o sul sito internet [www.imergroup.com](http://www.imergroup.com) area Service) ed al momento della richiesta l'acquirente dovrà documentare la data d'acquisto della macchina. Per garanzia si intende la riparazione e/o sostituzione di quelle parti che risultassero difettose di fabbricazione. Per tutti i beni prodotti dalla Imer International s.p.a. la garanzia è di un anno dalla data di spedizione o consegna all'utilizzatore. Le riparazioni effettuate in garanzia non interrompono il periodo della garanzia generale stessa. La garanzia comprende, la riparazione e/o sostituzione delle parti che risultano difettose di fabbricazione; rimangono ad esclusivo carico dell'acquirente tutte le spese di trasferta relative alle riparazioni eseguite presso l'acquirente stesso.

Gli interventi in garanzia, anche se da eseguirsi presso la sede del Centro di Assistenza Autorizzato, sono sottoposti al benestare tecnico da parte della Imer International s.p.a. ai fini del riconoscimento ufficiale degli stessi.

La garanzia non è applicabile nei seguenti casi:

- nei casi in cui la riparazione o la sostituzione di parti difettose venga eseguita in centri assistenza non autorizzati;
- nei casi in cui il difetto sia da imputare all'uso di ricambi non originali;
- nei casi in cui l'acquirente installi sul prodotto accessori non originali o non espressamente previsti sul manuale d'uso e manutenzione;
- nei casi in cui il prodotto sia stato modificato, riparato, smontato o comunque manomesso dall'acquirente o da terzi;
- nei casi di modifiche sostanziali fatte senza approvazione espressa da parte del servizio Assistenza IMER, che in qualche modo influiscono sul mal funzionamento della macchina;
- nei casi dovuti ad una scorretta messa in servizio ed un uso non conforme della macchina, al non rispetto delle istruzioni indicate nel manuale d'uso e manutenzione o alla non esecuzione degli interventi di manutenzione programmata;
- nei casi di calamità naturali;
- nei casi di normale usura;
- nel caso di danni causati dall'uso di carburanti e lubrificanti inadatti;
- nel caso di danni ai componenti elettrici causati da un inadeguato impianto di distribuzione, da disturbi provenienti dalla rete elettrica d'alimentazione o da collegamenti non effettuati secondo le disposizioni riportate sul manuale d'uso e manutenzione.

Per eventuali controversie è competente il Foro di Siena - sezione distaccata di Poggibonsi - Italia.

### **CONDITIONS DE GARANTIE**

Le service de garantie il faut le demander au centre assistance autorisé Imer le plus proche (on peut voir la liste dans notre réseau de vente ou sur notre adresse web [www.imergroup.com](http://www.imergroup.com) dans la partie Service); au moment de la demande de garantie il faut documenter la date d'achat du produit. Garantie signifie la réparation ou le remplacement des pièces qui ont un défaut de fabrication.

Pour tous les produits de Imer International Spa La garantie est de un an à partir de la date de livraison du produit même.

Le réparations effectuées pendant la période de garantie n'interrompent pas la période de garantie général. La garantie comprend la réparation ou le remplacement des pièces défectueuses (qui ont un défaut de fabrication); tous les transferts vers et de notre centre assistance pour des réparations chez le client seront chargé au client. Les réparations en garantie, même s'elles sont effectuées chez un des nos centre assistance autorisé, il faut que soient approuvées par les techniciens du Service Assistance de Imer International Spa pour autoriser la réparation.

La garantie n'est pas approuvé dans les cas suivants:

- Dans le cas dont la réparation ou le remplacement des pièces soit effectué dans un centre assistance pas autorisé;
- Dans le cas dont le défaut soit du à l'utilisation des pièces de rechange pas originels
- Dans le cas dont le client installe sur le produit des accessoires pas originels ou pas prévus dans le manuel de usage et entretien;
- dans le cas dont le produit soit modifié, réparé, démonté par le clients ou tiers;
- dans le cas de modifications faites sans approbation du service assistance Imer qui peuvent influer sur le fonctionnement de la machine;
- dans le cas de incorrecte mise en service et usage pas conforme du produit, et pas conforme aux instructions du manuel de usage et entretien et de la correcte maintenance programmée;
- en cas de calamités naturelles;
- en cas de usure;
- en cas de dégâts causés par l'utilisation des carburants et lubrifiants pas corrects;
- en cas de dégâts aux components électriques causés par une installation inadéquate, en cas de problèmes à la ligne électrique ou connexions pas effectués selon les directions du manuel de usage et entretien.

En cas des controverses, le tribunal compétent est celui de Sienne - section détachée de Poggibonsi - Italie.

### **WARRANTY CONDITIONS**

The service under terms of warranty has to be required to the closest Authorised Assistance Centre (you can find the list in our sales network or check it on our website [www.imergroup.com](http://www.imergroup.com) in the Service area); the buyer has to apply for warranty always showing documents about the date of purchase of the item itself.

As warranty we mean reparation or substitution of those spares that have manufacturing defects.

For all the Imer International products, the terms of warranty are one year after the date of delivery to the user.

Reparations done during the warranty period do not interrupt the period of the general warranty itself.

The warranty service include reparation or substitution of all the defective parts; if the reparation is done at the customer's place all the transfer to and from the assistance centre will be charged to the purchaser.

All the reparations under terms of warranty, even if done in one of our authorised assistance centres, have to be approved by Imer International Service department in order to allow the reparations.

The warranty cannot be accepted in the following cases:

- When the reparation or substitution of the parts has been done by a non-authorised Imer assistance service;
- When the cause of the problem is due to the use of non original Imer spare parts;
- When the user install on the machine non original or not indicated on the manual accessories;
- When the product has been, modified, repaired, disassembled from the buyer or from others;
- When there are modifications in the product done without Imer authorisation that can have influence on the correct functioning of the product;
- In case of incorrect start-up, incorrect use of the machine, incorrect use of the instruction given in the operating and maintenance manual, and not execution of the maintenance scheduled procedures;
- In case of natural disasters;
- In case of standard wear and tear;
- In case of damages caused by use of inadequate fuel and lubricant;
- In case of damages to the electrical components caused by an inadequate electrical system, in case of problems given by the electrical alimentation net, or by connections done without following the instruction of the operating and maintenance manual.

For any argument, please address to the place of Jurisdiction of Siena - section of Poggibonsi - Italy.

## GARANTIEBEDINGUNGEN

Fordern Sie die Garantieleistung beim nächstgelegenen Autorisierten Servicezentrum (das Verzeichnis können Sie bei den autorisierten Händlern oder auf der Internetseite [www.imergroup.com](http://www.imergroup.com) Bereich Service) einsehen. Der Kunde muss bei Anforderung des Service das Kaufdatum der Maschine belegen können. Mit Garantie ist die Reparatur und/oder der Ersatz der Maschinenteile gemeint, die Fabrikationsmängel aufweisen sollten. Für alle von Imer International s.p.a. hergestellten Produkte hat die Garantie einjährige Dauer ab Versand- oder Übergabedatum an den Anwender. Die erbrachten Garantiereparaturleistungen bewirken keine Unterbrechung der allgemeinen Garantie selbst. Die Garantie erstreckt sich auf die Reparatur und/oder den Ersatz der von Fabrikationsmängeln betroffenen Maschinenteile; vereinbart bleibt, dass sämtliche Reisespesen für am Standort des Käufers erbrachte Reparaturen ausschließlich zu dessen Lasten gehen.

Auch die beim Autorisierten Servicezentrum zu erbringenden Garantieeingriffe bedürfen zu ihrer offiziellen Bestätigung der technischen Bewilligung durch Imer International s.p.a. Nicht anwendbar ist die Garantie in folgenden Fällen:

- falls die Reparatur und/oder der Ersatz der defekten Teile in nicht autorisierten Servicezentren vorgenommen wird;
- falls der Defekt auf die Verwendung von Nichtoriginalersatzteilen zurückzuführen ist;
- falls der Käufer keine Originalersatzteile oder keine ausdrücklich in den Gebrauchs- und Wartungsanleitungen vorgeschriebenen Teile ins Produkt einbaut;
- falls das Produkt vom Käufer oder von Dritten umgebaut, repariert, auseinandergebaut oder wie auch immer beschädigt wurde;
- falls substanzielle Änderungen ohne ausdrückliche Genehmigung vonseiten des IMER Kundendienstes vorgenommen wurden, die auf egal welche Weise zu Betriebsstörungen der Maschine beitragen;
- bei durch eine unsachgerechte Inbetriebnahme und einen zweckfremden Gebrauch der Maschine, durch die Nichteinhaltung der in den Gebrauchs- und Wartungsanleitungen erteilten Anweisungen oder durch das Versäumen der planmäßigen Wartungseingriffe verursachten Mängeln;
- bei Naturkatastrophen;
- bei normalem Verschleiß;
- bei durch die Verwendung ungeeigneter Kraftstoffe und Schmiermittel verursachten Schäden;
- bei durch eine nicht sachgerechte Schaltanlage, durch Störungen im Versorgungsnetz oder durch nicht den Anweisungen in den Gebrauchs- und Wartungsanleitungen entsprechenden Anschlüsse verursachten Schäden an den Elektrokomponenten.

Etwaige Streitfragen fallen unter die Zuständigkeit des Gerichtshofs Siena - Außenstelle Poggibonsi - Italien.

## CONDICIONES DE GARANTIA

El servicio en garantía tiene que ser pedido al centro de asistencia Imer autorizado más cercano (la lista se puede pedir á todos nuestro revendedores y se encuentra en el sitio web [www.imergroup.com](http://www.imergroup.com) en el área de Service); al momento de la petición de garantía el comprador tiene que comprobar la fecha de compra de la máquina.

Por garantía se entiende la reparación y/o la sustitución de los recambio que resulten defectuosos de fabricación.

Para todos los productos Imer International Spa el período de garantía es de un año de la fecha de compra de la máquina. Todas las reparaciones efectuadas en el período de garantía no interrumpen la garantía misma. La garantía incluye la reparación y/o sustitución de los materiales que tienen defectos de fabricación; todos los gastos de viaje para las reparaciones hecha en casa del cliente serán á cargo del cliente mismo.

Las intervenciones en garantía, también si están hecha en uno de nuestros centro de asistencia autorizada, tienen que ser aprobadas por los técnicos del Servicio Asistencia de Imer para autorizar la reparación misma.

La garantía no se puede aceptar en los casos siguientes:

- En el caso que la reparación y/o la sustitución de los ricambios que resulten defectuosas sea hecha por un centro de asistencia non autorizado;
- En el caso que el defecto haya sido provocado por el uso de recambios non originales;
- En el caso que el comprador haya utilizado accesorios non originales o que no estaban contemplados en el manual de uso y mantenimiento;
- En el caso que el producto sea modificado, reparado, desmontado por el comprador o terceros;
- En el caso de modificaciones sustanciales hechas sin aprobación del servicio asistencia Imer, que pueden influir en el mal funcionamiento de la máquina;
- En el caso de una incorrecta puesta en servicio de la máquina o de un uso non conforme; en el caso que no se respecten las normas indicadas en el manual de uso y mantenimiento o si no se hacen los mantenimientos programados;
- En el caso de calamidad natural;
- En el caso de normal desgaste;
- En el caso de daños provocados por el uso de combustibles y lubricantes non adecuados;
- En el caso de daños a los componentes eléctricos provocados por una incorrecta instalación de la red eléctrica, en el caso de interferencias procedentes de la red eléctrica de alimentación o en el caso de conexión hecha de manera non-conforme al manual de uso y mantenimiento.

En el caso de controversias es competente el Foro de Siena - agencia de Poggibonsi - Italia
