

The Original Portable Hoist

The Genie® brand was born in 1966 with the original Genie Hoist — a unique portable pneumatic lift that was so successful, it launched the development of a full range of material hoists and aerial work platforms. Today's Genie Super Hoist™ continues the legacy of innovation with an incredibly compact, easy-to-use design. This portable telescoping pneumatic hoist uses CO₂ or compressed air to lift up to 136 kg (300 lbs) to heights of 3.8 m (12 ft 5.6 in) or up to 113 kg (250 lbs) up to 5.6 m (18 ft 4.5 in).

Flexible Power

The hoist is powered by either CO₂ or compressed air and provides approximately 80 to 90 lifts from a single tank of CO₂. The “one size fits all” bottle mounting bracket accepts any common CO₂ bottle size. A 9 kg (20 lb) CO₂ tank is also available as an accessory. The hose stretches 4.87 m (16 ft) for added mobility and stores around brackets underneath the platform when not in use.

Easy Operation

Up and down functions, including the dump valve, can all be activated from the patented pistol-grip control handle, which clips to a storage button on the side of the cylinder when not in use.

Lightweight, compact and portable, this telescoping pneumatic hoist allows an individual to lift heavy loads into place for installation.

Platform Cradle Package

Available as an accessory to handle odd-shaped items.

Versatile Applications

Lift, position and install a wide variety of materials, including metal and fiberboard air ducts, overhead sprinklers/plumbing, drywall and ceiling panels, and electrical fixtures.

Quick, Easy Setup

Sets up in seconds — no special tools required. The one-piece platform attaches to the cylinder with a twist of the wrist. Legs fold out from the base, and the lock mechanism keeps each leg out for use (or up for storage). Casters also lock in place with the touch of a toe.

Lightweight, Compact Design

The compact size and weight allow one person to lift and move heavy loads, yet quickly move from job to job. The hoist is completely portable and easy to store and transport. It's so lightweight and compact, it fits in the trunk of most cars.
